- Vulnerability Assesment
- Information Security
- Android Studio

2. Tools & Technologies

- XML
- Firebase
- Github
- CSS
- C++
- [React.js](#)
- HTML5

Projects

● Mini AirBnB

MiniAirBnB is a full-stack web application inspired by Airbnb, built to understand how real-world web platforms handle authentication, data relationships, geolocation, media storage, and cloud deployment. The project focuses on backend engineering, secure user flows, and production-ready architecture rather than just UI replication.
